

## 6. Navigation and feature summary PRO subscription view

## 7. Define your zones

# POGO<sup>Pro+</sup> Quick Start Guide

## 8. Sample & Log

With the basic setup complete, you're ready to start gathering data with your new POGO. Some tips:

- Turn on your POGO before you head out to the first zone, giving it enough time to acquire a minimum 9 satellites for sub-meter accuracy. Keep the POGO turned on until you're done sampling and logging for the day.
- For best visual insight precision, we recommend 3-4 samples per 1,000 sq ft. That is about 9-18 per green, 18-24 per fairway, and 24-40 per sport turf field or other large turf area.
- You can sync at any time so that you and others on your account can view and learn from POGO's Visual Insight and analysis features.

## Certificate of Testing ✓

Serial Number:

Air Test:  Moisture/Bulk EC:

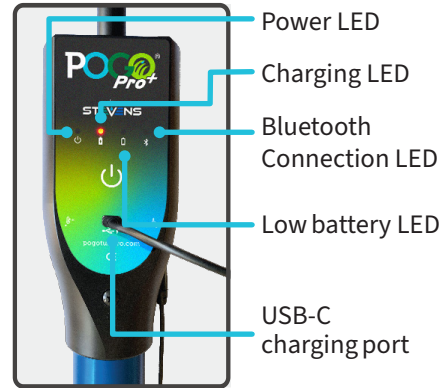

Distilled Water Test:  Moisture/Bulk EC:

Batteries Charged:  Technician:

# 1. Charge Your POGO Pro+

Prior to first use, plug the POGO power adapter into the USB-C charging port to fully charge it.

- Charging takes about 4 hours to fully charge a depleted battery.
- Your POGO will last 3-5 days with a fully charged battery.
- If the battery needs charging, the “low battery” LED will appear.
- You can use a 5V USB-C to charge your POGO. Charger is included.
- Led turns off when fully charged

# 2. Get the free TurfPro Mobile app

Install the TurfPro Mobile app on your iOS or Android device. Either search for “TurfPro Mobile” in the Apple App Store or the Google Play store, or scan the QR codes below.

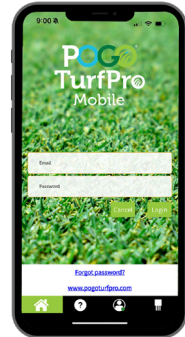

TurfPro Mobile

# 3. Login or register a new account

## Login

If you’ve used POGO before, log in with your email address and password.

If you acquired your POGO from a distributor or if someone else from your company has already registered an account, they must create your user account for you (otherwise a duplicate account will be created).

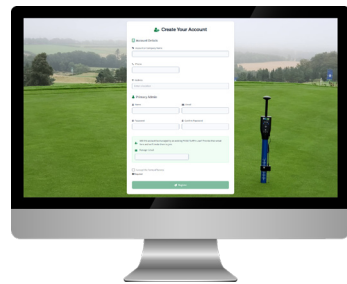

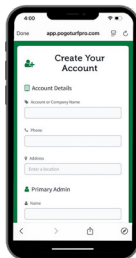

Company accounts share data among all users. Contact the Admin account holder for your company and ask to be added as a user to your company account under ‘Administration’ when logged into TurfPro Cloud.

## Register a new account

If you’re new to POGO, you’ll need to register a new account.

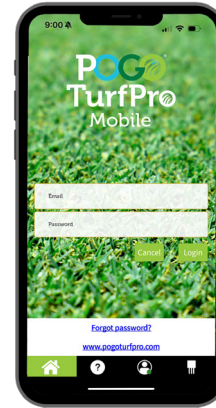

Begin by navigating to [app.pogoturfpro.com/app/register](http://app.pogoturfpro.com/app/register) on your mobile or desktop browser, or scan the QR code.

Fill out the registration form with your information. Once you register, watch your email for verification. If you do not see an email, be sure to check spam.

Once your new account is activated, you will need to choose a subscription plan. Opting for the **Pro** or **Boost** subscription tier is recommended for POGO Pro+ users.

# 4. Connect your POGO

In the TurfPro Mobile app log in with your new user account.

Bluetooth connection is done using the TurfPro Mobile app.

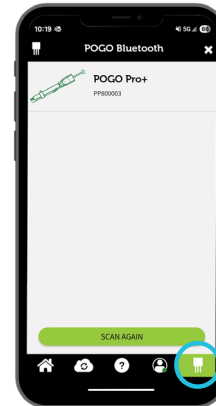

Power on your POGO Pro+ and ensure Bluetooth is active on your phone or tablet.

Navigate to the POGO icon on the bottom right corner of your app.

Your POGO device will appear under the POGO connection tab.

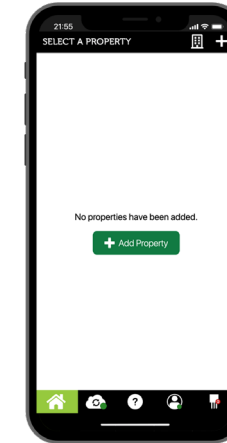

Select the device and you’re connected!

Visit the POGO TurfPro channel on YouTube to view videos on steps 5-8, or continue reading.

# 5. Add your property

Once you log in you’ll be shown a screen that lets you select the property that you’ll want to manage. If the company account was just created, there will be no properties to select so you’ll need to add one or more.

Fill in the form. A property can be a golf course, sports field, landscape, research area or other.

With your property added, you’ll see your list of available properties every time you log in. Select the property you wish to monitor.
